

ROLL - ON

THE "ROLL-ON" METHOD OF WATERPROOFING, USING ROFLEX APP POLYESTER MEMBRAN

The "ROLL-ON" method of waterproofing involves the use of a highly sophisticated membrane, especially Factory manufactured in Egypt, by an ISO 9001-2000 certified company "ModernWaterproofing Co." with a world- wide reputation,. The outstanding features are:

- 1) Total impermeability.
- 2) Rapid Application,
- 3) Ability to treat even damaged surfaces of Koba, China Mozaic etc., very economically and permanently, without breaking and remaking the substrate at great expense.
- 4) The Top surface, though normally black, can be painted Silver or any other colour or given an attractive Granular texture in Grey or Green finish which would be aesthetically pleasing.
- 5) "Roflex" Polyester Membranes are extremely tough and long lasting (up to 10 years).
- 6) Factory manufactured membranes.
- 7) The sandwiched Polyester inside "Roflex", provides 100% waterproofing.
- 8) Easily repaired if damaged.
